June 30, 2023

PERSPECTIVE

Economy Review & Outlook

The fiscal year 2023 remained a difficult year for Pakistan as it faced multiple macroeconomic challenges. The 2022 monsoon floods, global commodity prices and currency devaluation ushered a wave of inflation with average FY23 CPI reading of 29.0% the highest since 1974. In addition, the interest rates were hiked to a record high of 22.0%. The IMF program remain elusive throughout the latter half of fiscal year as political uncertainty remained at an elevated level paralyzing economic decision making. As a result, the rupee depreciated 40% against the greenback with USD closing at PKR 286.

The new fiscal year has opened on a positive note as IMF and Pakistan have struck a staff-level agreement for the provision of USD 3bn in bailout funds under a stand-by arrangement (SBA) for nine months. This is a welcome development, that will help Pakistan to unlock funding from bilateral and multilateral sources helping in rebuilding foreign exchange reserves. This has averted the risk of near term default as reflected by the stunning recovery of Pakistan International Eurobonds (2024 Eurobond YTM has corrected from its peak of 122.8% to 59.9%).

The country's exports increased by 7.6% month on month to USD 2.4bn, while imports declined by 3.4% to USD 4.2bn, improving the trade deficit by 14.8% to USD 1.8bn in June-23. For FY23, the trade deficit narrowed by 43.0% to USD 27.5bn, with exports dropping by 12.7% to USD 27.7bn, while imports reduced by 31.0% to USD 55.3bn. CPI based inflation for June-23 clocked at 29.4%, decreasing by 26 basis points (bps) during the month. The deceleration in CPI was driven by food prices which declined by 1.0% month on month. The core inflation eased to 21.2% compared to 22.8% recorded in the previous month. The inflation readings have peaked and going forward we expect headline and core inflation to ease further as base effect will come into play.

The country's provisional GDP growth clocked at 0.29% in FY23 with Agricultural and Services sector increasing by 1.6% and 0.9%, respectively. Whereas Industrial segment witnessed a drop of 3.9% for the year, as high interest rates and import restrictions took their toll on the industrial output. On the fiscal side, FBR tax collection increased by 16.4% in FY23 to PKR 7,154bn compared to PKR 6,149bn in the same period last year and below the target by PKR 486bn.

Going forward updates on the IMF program and flows from bilateral and multilateral sources will provide a road map for fiscal and monetary actions in the medium term.

Money Market Review & Outlook

The short term secondary market yields increased by an average of 79 basis points (bps) while longer tenor yields rose by 52bps during the month. The increase in yields was due to the surprise interest rate hike of 1.0% in the emergent monetary policy on 26 June 23 to help close the IMF deal.

SBP conducted the Treasury bill auction on June 21, 2023. The auction had a total maturity of PKR 2,165bn against a target of PKR 2,250bn. SBP accepted total bids worth PKR 2,247bn in 3 months' tenor, PKR 10.7bn in 6 months' tenor & PKR 46.3bn in 12 months' tenor at a cut-off yield of 22.00%, 21.97% & 22.00% respectively. The auction cutoff was maintained as compared to last month. Auction for Fixed coupon PIB bonds was held on June 27, 2023 having a total target of PKR 160bn. SBP accepted bids worth 90bn in 3years at a cut off rate of 19.35%.

Going forward we expect SBP to maintain status quo in the near term as Pakistan has entered into a new IMF program. However, the buildup of foreign exchange reserves and declining inflation will provide space for the SBP to start the monetary easing cycle in the later part of the fiscal year. The pace and timing would be determined by the trend in Forex reserves.

Equity Market Review & Outlook

The benchmark KSE-100 remained muted during Jun-23 with index increasing by a mere 122 points (0.3%) to close the month at 41,453 points. This brought the KSE-100 index to close the fiscal year 2023 on a flatish note with a cumulative return of -0.2%.

The month of June 2023 started on a positive note, with the market initially gaining 2% as investors expected a balanced budget that would end the long deadlock over the 9th review under the stalled IMF program. However, the steam soon fizzled out, and the index corrected by ~3% mid of the month as Budget for FY24 fell short of meeting the prior conditions demanded by the IMF, leading to more uncertainty amongst the investors.

Nonetheless, GoP reassessed its position and bought in necessary adjustments before the passage of the budget in the National Assembly along with removal of import restrictions to realigned itself with the IMF requirements. Moreover, SBP also raised interest rates by 100bps at the end of month. All this restore some confidence back into investors and helped closed the month on neutral note.

The market activity remained dull with average traded volume increased by 3% MoM and the average value traded decreased by 7% MoM. On the local front, Mutual Funds and insurance were net sellers with an outflow of USD 14.2mn and USD 5.3mn, which was mainly absorbed by corporates and individuals with cumulative USD 14.1mn worth of net buying. Moreover, Foreigners also turned net buyers with inflows worth USD 6.2mn.

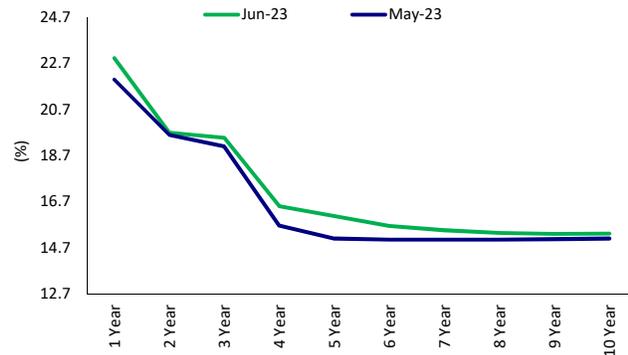

On the sectoral front, Chemicals, Autos, OMCs added 275, 135, and 131 points, respectively. Positive contribution from Chemical and Autos was largely due to interim dividend/bonuses announced by COLG & MTL. While OMC sector came into limelight due to news pertaining to clearance of circular debt.

In the short-term, the approval of SBA by IMF executive board along with development on political front will set tone for the market. We just witnessed a glimpse of it as KSE-100 Index posted a 2,446 points (5.9%) jump in a single day as market opened just after the news of SBA. Market participants will be following developments on the external front for additional financing from bilateral and multilateral sources post SBA with IMF. We reiterate our stance on the deep discount the stock market is offering at the current level evident from forward Price to Earnings of 4.7x with an attractive dividend yield of 11.8%. These deep valuations are attractive enough for investors having medium to long term horizon. However, we stress that this valuation potential will only be realized as external position starts easing out.

Investment Objective

To generate risk adjusted returns by investing in short, medium and long-term Shariah Compliant Fixed Income instruments.

Manager's Comment

During the month, the fund generated an annualized return of 19.72% against its benchmark return of 7.08%. WAM of the fund was 2.1 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, banking, microfinance and miscellaneous sectors.
