2.4 Risk Disclosure

Investors must realize that all investments in mutual Funds and securities are subject to market risks. Our target return / dividend range cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

- (1) **Equity Risk** – Companies issue equities, or stocks, to help finance their operations and future growth. The Company’s performance outlook, market activity and the larger economic picture influence the price of a stock. Usually when the economy is expanding, the outlook for many companies is good and the stock prices may rise and vice versa.
- (2) **Government Regulation Risk** – Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (3) **Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk. Each can have negative impact on the value of the income and money market instruments including Sukuks etc:
- (4) **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
- (5) **Credit Spread Risk** - The risk that there may be an increase in the difference between the return/markup rate of any issuer's security and the return/markup rate of a risk free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments

- (8) **Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing/ selling its investments which may affect the Fund’s performance etc.
- (9) **Reinvestment Rate Risk** –In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (10) **Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.

- h) Dividends declared on the units held under the ALHAA Monthly Drawings Account shall be reinvested (net of taxes and the Haram component, if any) in units of ALHAA and included in the ALHAA Monthly Drawings Account. - l) The units bought out of funds deposited at the time of opening an account or out of fresh funds added to the account shall be issued at the respective offer Prices applicable for ALHAA on the day the funds and the investment Application Form, duly completed, are lodged with the Distributor.
- m) In the event of winding up of ALHAA, the ALHAA Monthly Drawings Account shall be discontinued and the units standing to the credit of the Subscriber shall be dealt with in the same manner as the rest of the units in ALHAA. The Management Company may at any stage discontinue the ALHAA Monthly Drawings Account. In that event existing subscribers shall continue to be the investors of ALHAA.
- n) The Registrar shall not record a lien on the funds or units held in the ALHAA Monthly Drawings Account.
